

10/4/023 “Defining Pediatric Sepsis: Saving Lives with Early Recognition”

CONTINUING EDUCATION CREDIT INFORMATION FOR THE ON-DEMAND PROGRAM

Event Learning Outcomes

At the completion of this educational activity, the learner will be able to:

- Describe the most contemporary guidelines for pediatric sepsis
- List the differences between pediatric sepsis and adult sepsis
- Examine the impact of early recognition on outcomes
- Identify common payer denials for pediatric sepsis

Speakers

Wendy Arafiles, MD, has been a practicing pediatric hospitalist at Phoenix Children's Hospital for 15 years with a specific interest in children with medical complexity and technology dependence. She has also filled the role of medical director of the CDI program since 2018. In her dual roles, she intertwines skills in medical education, innovations in quality improvement for children with medical complexity, and a foundational understanding of hospital finance. Her goals are to optimize the institution's ability to describe the complexity of the patient population and develop high-value programs in patient and family services. She has presented on both CDI and medical complexity topics at several national conferences, and she is an active member of the Pediatric Documentation Research Collaborative, a research group that focuses on documentation-related issues in pediatric hospitals.

Amy Sanderson, MD, is a pediatric intensivist at Boston Children's Hospital (BCH) and is an assistant professor in anaesthesia at Harvard Medical School. She was the physician advisor for the BCH CDI program for eight years. Sanderson has presented at several national conferences, has published scholarly articles on medical documentation, and contributed to the book *Pediatric CDI: Building Blocks for Success*. In addition, she is a founding member of the Pediatric Documentation Research Collaborative, a research group that focuses on documentation-related issues in pediatric hospitals.

Program Agenda

- Guidelines for pediatric sepsis
 - Understanding recent updates
- Pediatric sepsis vs. adult sepsis
 - Pediatric patients are not little adults
 - Signs and symptoms
- How early recognition has a huge impact on patient outcomes
- Payer denials for pediatric sepsis
 - Troubleshooting common denials
